

PolyKar[®] ODMASTOVAC

Mixture of special solvents, category : Thinners

DESCRIPTION AND USAGE

PolyKar ODMASTOVAC is used for cleaning of the surface before filling or varnishing. Impurities (as for example silicon, wax and grease) affect the quality of upper coatings negatively, especially its adhesion and cohesion. It can be applied both on metal and plastic surfaces.

ENVIRONMENT

PolyKar ODMASTOVAC must not be used for filling places which are in direct contact with food and drinking water.

STORAGE AND PACKAGING

It is necessary to ensure the temperature +5°C - +20°C and avoid direct solar radiation during storage and transport. Store in dry and cold place. We guarantee shelf life and quality of the product for 12 months.

Packaging:

- 1 l, 5 l – can

COLOUR

Transparent
