

# PolyKar<sup>®</sup> ML

Protective spray coating for cavities, category : Protective coatings

**DESCRIPTION AND USAGE**

One-component preparation PolyKar ML is intended for protection of closed profiles on car bodies. It is based on waxes and lanoline. It dries at room temperature by reason of solvent evaporation. It protects perfectly against corrosion. It has excellent impregnating properties deep in cavities, where forms elastic coating, which protects against water and soil treatment. It has very good ability to displace the dampness from the surface.

reactive primers	++
Plastics	++

++ excellent / + good / o satisfactory / - not satisfactory

**ENVIRONMENT**

The preparation must not be used for filling places which are in direct contact with food and drinking water.

**APPLICATION**

The surface must be clean, dry and compact before application. Places, which are not intended to be treated by the preparation, must be covered.

PolyKar ML is applied into closed spaces through special, already existing holes in profiles (doors, front panel, thresholds etc.) by means of the hose on the spray gun.

At temperature 20°C the preparation is dry after 2 – 4 hours.

1 liter of preparation covers about 7 m<sup>2</sup> in thickness of layer 50 µm.

The preparation doesn't work as etching on painted surfaces.

**Content in the can must be shaken well before usage!!!**

**TOOLS CLEANING**

Dirty parts of tools can be cleaned with white spirit or similar solvent. Only non-hardened preparation can be cleaned.

**STORAGE AND PACKAGING**

It is necessary to ensure the temperature from +5 °C to 25°C and avoid direct solar radiation during storage and transport. Store in dry and cold place. We guarantee shelf life and quality of the product for 24 months.

Packaging:

- 1 l – cartouche to spraygun

**COLOUR**

Amber
